DETAILED ACTION

Allowable Subject Matter

1. Claim 1-8, 10-17 allowed.
2. The following is an examiner's statement of reasons for allowance:.

For Claims 1 and 15: primarily, the prior art of record does not disclose or suggest in the claimed combination: an output voltage detecting circuit that detects a voltage level of the DC output voltage of the power supply circuit; an output voltage control circuit that compares the reference voltage with the voltage level detected by the output voltage detecting circuit to produce an output signal corresponding to a difference between the reference voltage and the detected voltage level, the output signal of the output voltage control circuit being applied to the first switch to control the level of the DC output voltage of the power supply circuit; wherein the control unit includes means for controlling the second switch to turn ON and OFF, and means for producing the control signal applied to the output voltage setting circuit to select a voltage level which is close to the detected voltage level across the battery when the second switch is turned OFF and the control unit detects that the battery is connected to the battery charger.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
